Hello!

I am looking forward to studying science with you this year! We will study God's amazing works that He put into us! As it says in Psalms 139, "I praise you because I am fearfully and wonderfully made; **Your works are wonderful**, I know that full well." We will begin with the structure of cells, learn about our anatomy and how it all works together (= physiology). We will also consider how God wants us to care for our bodies and how to honor Him with them as well. All this will fill this year of Middle School science with lots to explore!

Students will have a lot of basic knowledge to cover and get to apply their general knowledge through experiments, projects and some individual study of specific body systems. **We will build notebooks** as we go along, so students should be able to tell parents some of what they are learning on a daily basis. In fact, "narrating" specific points of study will often be part of their assignments, so enjoy what they are learning.

Remember, **attendance is important** as each day in class sets the stage for 2-3 days of study. So, **come prepared and keep up with your studies**. Contact me if you have any questions throughout the year. My contact information and available times are above.

**Grades:** will be based on attendance, class participation & knowledge learned as seen through assignments, projects and tests.

**Supplies:** check the CVA website list, but the general needs include:

- A binder and loose-leaf paper. I find a separate small 3 ring binder just for science is easiest, but it can be part of a larger multi subject binder.
- They will need access to the internet to research information as we go along. (let me know if this is a problem.)

Our family has been at CVA the last 5 years and I have taught Middle School Science here the last 2. I look forward to getting to know you all better.

In Christ,  
Marjorie Haley

It is the **Mission** of CVA to educate our students, using biblically sound teachings; in order that they may impact their world for Christ. We do this by utilizing our hybrid program to make individualized education plans. This is accomplished through on-campus, online, and home education programs.

It is the **Vision** of CVA to equip each student with a quality Christian education firmly based in the Word of God, so that they are fully prepared to take the love of God into all the earth.
